

Hilton Hotel, Sydney
15 -16 November 2007

Climate Change

the science, economics and policy implications

Climate change is a global issue which requires international perspective and approach.

The CEDA International Climate Change 2-day conference brings together speakers from Europe, North America, Asia and Australia to analyse the scientific and economic debate over climate change and explore cutting edge options for policy response.

You will hear from those directly involved in formulating local, regional and global initiatives that mitigate and manage the climate change risk.

Presented by
The International Counterparts

AUSTRALIA

Committee for Economic
Development of Australia

CHINA

China Institute for Reform and
Development

FINLAND

Finnish Business and Policy Forum

FRANCE

Development

Learn from International Experiences

Professor Ronald Prinn, Co-Director of the Joint Program on the Science and Policy of Global Change, MIT, USA

Advances and uncertainties in climate models

Dr Robert Shapiro, Chairman, SONECON, USA

Addressing the risks of climate change

Dr Jyoti Parikh, Executive Director, Integrated Research and Action for Development, India
India – balancing energy and climate policies for sustainable growth and development

Ned Helme, President and Executive Director, Centre for Clean Air Policy, USA
Developments in international policy

6 Key Benefits of Attending

- Participate in informed discussion and debate with international speakers
- Learn about the latest advances in scientific understanding on climate modelling
- Analyse the costs and other potential risks related to the impact of climate change
- Consider the policy implications, issues and options for Australia and the world in tackling climate change
- Understand the role of technology in cutting emissions in industrialised countries and developing economies such as China and India
- Review the implementation of emissions trading and explore post-2012 policy options
